## rule book

**let them eat cake** is a French Revolution-themed party game where peasants plot, the Queen hides, and only wit will keep you alive. For 5-10 players, ages 13+.

### in this box you'll find...

- A deck of **QUEEN** cards.
- A deck of **PEASANT** cards.
- A deck of **PROMPT** cards.
- Sticky notes to keep track of your answers.

## rounds & objectives

- The **QUEEN** has a constraint on her responses (along the lines of: sneak a shoe brand into each response, rhyme three words in each response, etc.)
- In Round 1, voting is optional.
- From Round 2 onward, players must vote to identify the **QUEEN**.
- Voting is done by popular consensus — each player casts one vote, and the majority decision determines who is accused.
- If a player is wrongly accused of being the **QUEEN**, they are executed (eliminated from the game).

## role play

- Prompts will be French Revolution-themed—or at least worded in that spirit.
- Feel free to tap into the mindset of a peeved peasant, or draw inspiration from your own personal experiences.

### assigning roles

- Lay the shuffled **PEASANT** and **QUEEN** decks face down.
- For  $n$  players, pull  $n - 1$  **PEASANT** cards. Pick one random **QUEEN** card from the **QUEEN** deck (without looking at the card's contents).

## assigning roles

- Shuffle the chosen cards together to form the **ROLE** deck.
- Deal one **ROLE** card face down to each player. Each player should keep their role secret.

### answering prompts

- At the start of a round, one player chooses a prompt from the shuffled deck of **PROMPT** cards, and shares it with the group. (The prompt picker can rotate each round, clockwise.)

## answering prompts

- Players then have 60 seconds to write a response to the prompt on their sticky notes.
- Once the time is up, each player takes turns reading out their responses.

## rounds & objectives

- We recommend playing three voting rounds (or four total rounds, if players skip voting in Round 1), though you can adjust based on the number of players.

## winning the game

- The **PEASANTS** win if they successfully identify the **QUEEN** by the end of the game.
- The **QUEEN** wins if she survives all three rounds without being correctly identified.

### challenge version

- The **PEASANTS** win only if they guess both the **QUEEN** and the **CONSTRAINT**.
- In the case that the **QUEEN** is correctly identified but her **CONSTRAINT** is not:

## challenge version

- The **PEASANTS** can force the **QUEEN** to play two more rounds with them to try and guess the **CONSTRAINT**.
- If they guess the **CONSTRAINT** correctly after two more rounds, the **PEASANTS** win. Otherwise, the **QUEEN** wins.
